

PLANMECA

Leading the way

Full Mac OS support

Planmeca is the first dental equipment manufacturer to offer full Mac OS operating system support for all its X-ray units. This is enabled by the Planmeca Romexis software, now compatible with Apple. Whichever the diagnostic requirement, the panoramic, intraoral, and 3D CBVT images can be acquired, viewed, processed, and stored in a Mac OS environment. Furthermore, the 2D and 3D images can be sent to an iPhone and iPad with one click. Enjoy Apple with Planmeca!
